## DETAILED ACTION

### *Election Requirements*

1. Claim 1 generic to the following disclosed patentably distinct species: The polymer in claim 1 encompasses different polymers, the varied polymers are ones where the degradable bond is a) anhydride, b) amide, c) thioester and d) ester, so that the degradation of each type of bond releases different drug. The species are independent or distinct because each bond is different giving rise to polymers that are capable of supporting different patents within the art. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Therefore, applicant is requested to elect a specific polymer that upon degradation releases a specific disclosed bioactive agent by electing:

- i) anhydride, amide, thioester or ester linkage
- ii) non-steroidal anti-inflammatory drug, anti-bacterial drug, anti-fungal drug, anti-cancer drug, antithrombotic drug, immunosuppressive drug, analgesic drug or anesthetic drug
- iii) and with the election of the specific linkage, and thus, specific polymer degrading to generate specific class of active agent according to the election in item ii), elect the drug that is specific to the class/group of drug generated from that linkage group.

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and **a listing of all claims readable thereon**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1618

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
